

# Ultrasonic Bath

Unified Product Overview & Model Differentiation

## Product Overview

Aureole Pharma Tech Ultrasonic Baths are designed to cover a wide spectrum of laboratory and industrial cleaning and processing applications. While all models share the same core ultrasonic technology and build quality, individual series differ in capacity, control level, temperature handling, and functional enhancements.

## Common Construction & Technology (Across All Models)

- SS 304 stainless steel tank and outer enclosure
- Imported PZT ultrasonic transducers with weld-bond technique
- Advanced MOSFET / IGBT based SMPS ultrasonic generator
- Digital timer and degas mode
- Uniform cavitation for consistent cleaning results
- Standard accessories: lid, basket, drain valve, power cord, user manual

## Model-wise Feature Comparison

| Parameter         | Eco Series    | Prime Series     | Advanced Control           | Heating & Shaking | Chiller Sonicator     |
|-------------------|---------------|------------------|----------------------------|-------------------|-----------------------|
| Capacity Range    | 3 – 22 L      | 6.5 – 30 L       | 30 – 50 L                  | Up to 20 L        | 10 – 20 L             |
| Tank / Body MOC   | SS 304        | SS 304           | SS 304                     | SS 304            | SS 304                |
| Ultrasonic Power  | 100 – 400 W   | 150 – 500 W      | 500 – 750 W                | High Power        | 250 – 400 W           |
| Frequency Options | 33 / 40 kHz   | 25 / 33 / 40 kHz | 33 kHz                     | 33 kHz            | 33 kHz                |
| Heating           | Yes           | Yes              | Yes                        | Yes (Precise)     | No                    |
| Shaking           | No            | No               | No                         | Yes               | No                    |
| Chilling          | No            | No               | Optional                   | No                | Yes                   |
| Control Level     | Basic Digital | Programmable     | Advanced / Process Control | Process-Oriented  | Temperature-Sensitive |
| Form Factor       | Table Top     | Table Top        | Floor Mounted              | Table Top         | Table Top / Floor     |

## How to Use This Comparison

The table highlights only those parameters that vary between ultrasonic bath variants. All other specifications and build-quality aspects remain common and are described in the main product description. This approach ensures clarity during selection while avoiding unnecessary repetition.

## Need Help Selecting the Right Model?

Our technical team can help you choose the most suitable ultrasonic bath based on capacity, process requirements, temperature sensitivity, and automation needs.
